

HYDROGEN INFRASTRUCTURE FOR TRANSPORT

HIT-2-CORRIDORS

9 October 2015

Dear Sir/Madam,

We herewith invite you to join our HIT-2-Corridors road tour event and workshop November 4, 2015 at 10.30 until 16:00 in the Hague, Netherlands. The aim of the meeting is to present and discuss a study and new business ideas and together take a step forward in the implementation of hydrogen in European road transport.

The meeting is part of Activity 3: "Strategic corridor analyses and plans" which is led by the ministry of Infrastructure and the Environment of the Netherlands and implemented by Rijkswaterstaat. A study - performed by Consortium 2.0 - has been set up to deliver the results. This study is based on a wide range of interviews with companies and people in the field of Fuel Cells and Hydrogen, analyses of the most important existing reports and on workshops given in expert groups. An important practical end product is the so called "Business case tool" which was developed in close cooperation with the Ministry.

The meeting is hosted by Rijkswaterstaat and will be opened by Floris Mulder who will explain the main findings of the study and the tool. After this Consortium 2.0 will present the study and the HRS-FCEV business case simulation tool, which is designed to help local governments and entrepreneurs. (HRS = hydrogen refueling station; FCEV = Fuel-Cell Electric Vehicle)

The tool gives the insights and the results of the project show:

- the way to customer demand
- how number of or capacity of HRSs and FCEVs are linked
- the link between affordable hydrogen and funds to co-finance the introduction phase
- that the total investment and the environmental goals of city or region are matched

After the presentation, the focus of the meeting will be discussions and exchange of ideas and experience, which will result in deeper insights, feedback to the simulation tool and a great foundation for the ongoing work within hydrogen as a transportation fuel. During and after the meeting it is possible to feel and drive a FCEV.

We look forward to meet you in the Hague.

Kind regards,

Geert Schaap, project manager HIT-2-Corridors project, Sweco, Sweden

Floris Mulder, coordinator RWS support for Actionplan Sustainable Fuels, Rijkswaterstaat
- Ministry of Infrastructure and the Environment, the Netherlands

For more information about the project <http://www.hit-2-corridors.eu/>

Adress Rijkswaterstaat, Koningskade 4, 2596 AA, The Hague

Meeting Room Bruningszaal, Room A.001

When November 4, 10:30 – 16:00

Registration: Mail to Annika Börje, Sweco, annika.borje@sweco.se (no later than Oct 24)

Co-financed by the European Union
Trans-European Transport Network (TEN-T)

Geert Schaap,
Project Manager
